Difference blu throws and throws Keyword

throw

i) It is used to beste an
exception object mannaly
ise ty programmer
(Otherwise by default
nethod is emposible
to med exception object)

- 2) 12 mainly used for huntime treepstions or Unchecked traffion
- 3) In case of twoos tryword we can throw enly single trieflion

thro ws

therows myword is used to declare the exceptions, i.e it indicate the exceptions, i.e it indicate the extent eather method that egiven fype effection can occur to handle it while calling.

It is mainly used for

comfile time exceptions or therhol treeptions

in case of feacues beywood we can obeclare multiple trueffions

- "throw is used within the nietwood
- · Show peyword i followed by new instance
- We cannot write any flatement after tenow rymoord by thus it can be used to livesh the Hatiment

et is med with meland Lynchuse

turous kyword is followed by class

several dees not have any sevele full.
